

Statement of Strategy

2020 – 2023

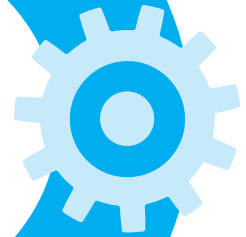

Equality and Human Rights

We work to ensure that older people are able to define how they live their own lives and are treated with dignity and respect.

Ageing in Place

We work to ensure that older people remain active, engaged and valued in their communities for as long as feasible, with choice and control over their lives.

LifeLong Learning

We work to ensure that older people have access to opportunities for learning and achieve outcomes from these that enable personal development, choices and engagement in community and in society.

Health and Wellbeing

We work to ensure that older people have access to the services and supports they require as they age to maintain, improve and achieve equality of outcomes in their physical health, mental health and social wellbeing.

Professional Organisation

We work to ensure that Age Action operates to the highest standards in the functions of employment, service provision and advocacy and in a manner that engages our values explicitly, consistently and coherently.
